VTCP2021

Law and the Proliferation of Big Data

INTERNATIONAL VIRTUAL TEACHING COLLABORATION PROGRAM

Thursday, 25th of November 2021

Time : 19.00 – 20.30 IWT (GMT +7)

Assoc. Prof. Sonny Zulhuda, LLB., MCL., Ph.D.
Associate Professor at Faculty of Law
International Islamic University Malaysia
▶ "Big Data, Privacy, and the Law"

Prof. Dr. Budi Agus Riswandi, S.H., M.Hum.
Professor at Faculty of Law Universitas Islam Indonesia
▶ "Big Data and the Challenges of Indonesian
Legal System"

Agenda

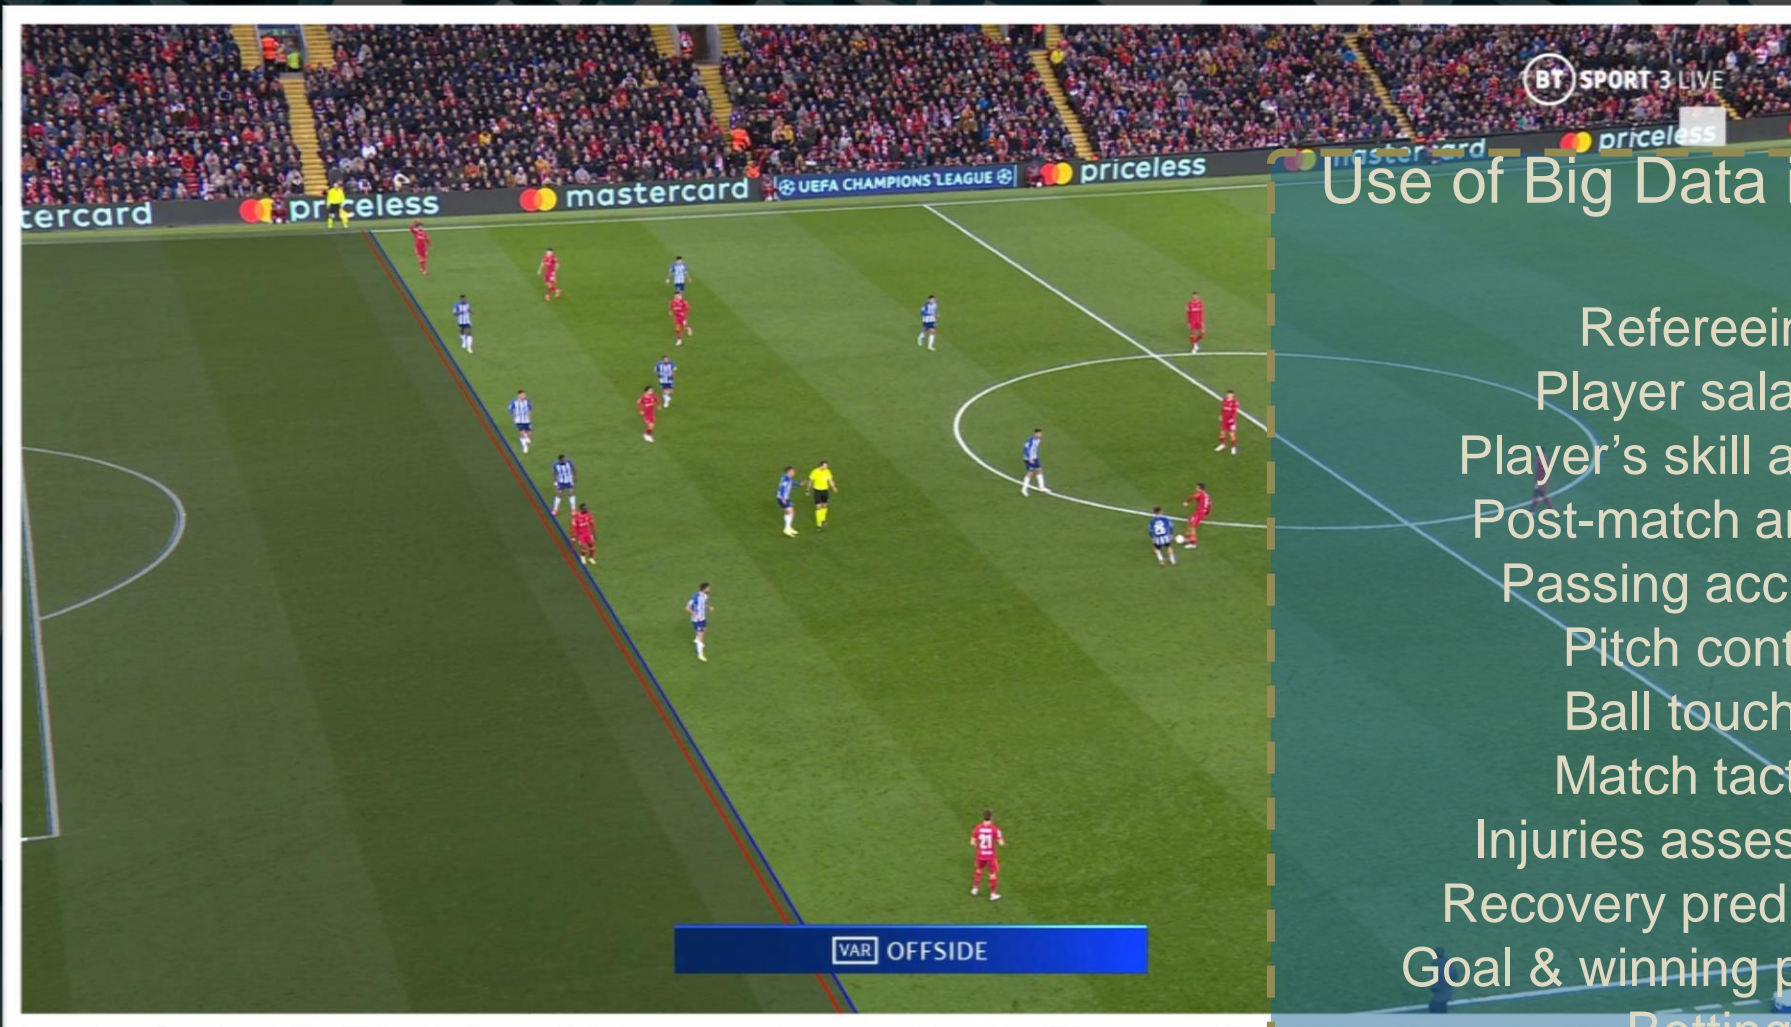

01 Datafication

02 Big Data

03 Legal Issues

04 Legal Framework

VAR data in today's match Liverpool vs Porto

Use of Big Data in Football:

- Refereeing
- Player salaries
- Player's skill analysis
- Post-match analysis
- Passing accuracy
- Pitch control
- Ball touches
- Match tactics
- Injuries assessment
- Recovery predictability
- Goal & winning probability
- Betting
- Social media interactions

RAINING?

sonnyzulhuda.com

“Datafication”

The process by which subjects, objects, and practices are transformed into digital data.

The process of **quantifying** all information around us: our location, movement, communications, usage of devices, etc. which will allow us to use such information in new ways, such as in predictive analysis.

This will help us further to unlock the implicit, latent value of the information

V. Mayer-Schonberger and K. Cukier, **Big Data: A Revolution That Will Transform How We Live, Work and Think** (2013).

- What's that thing you say, Olaf?

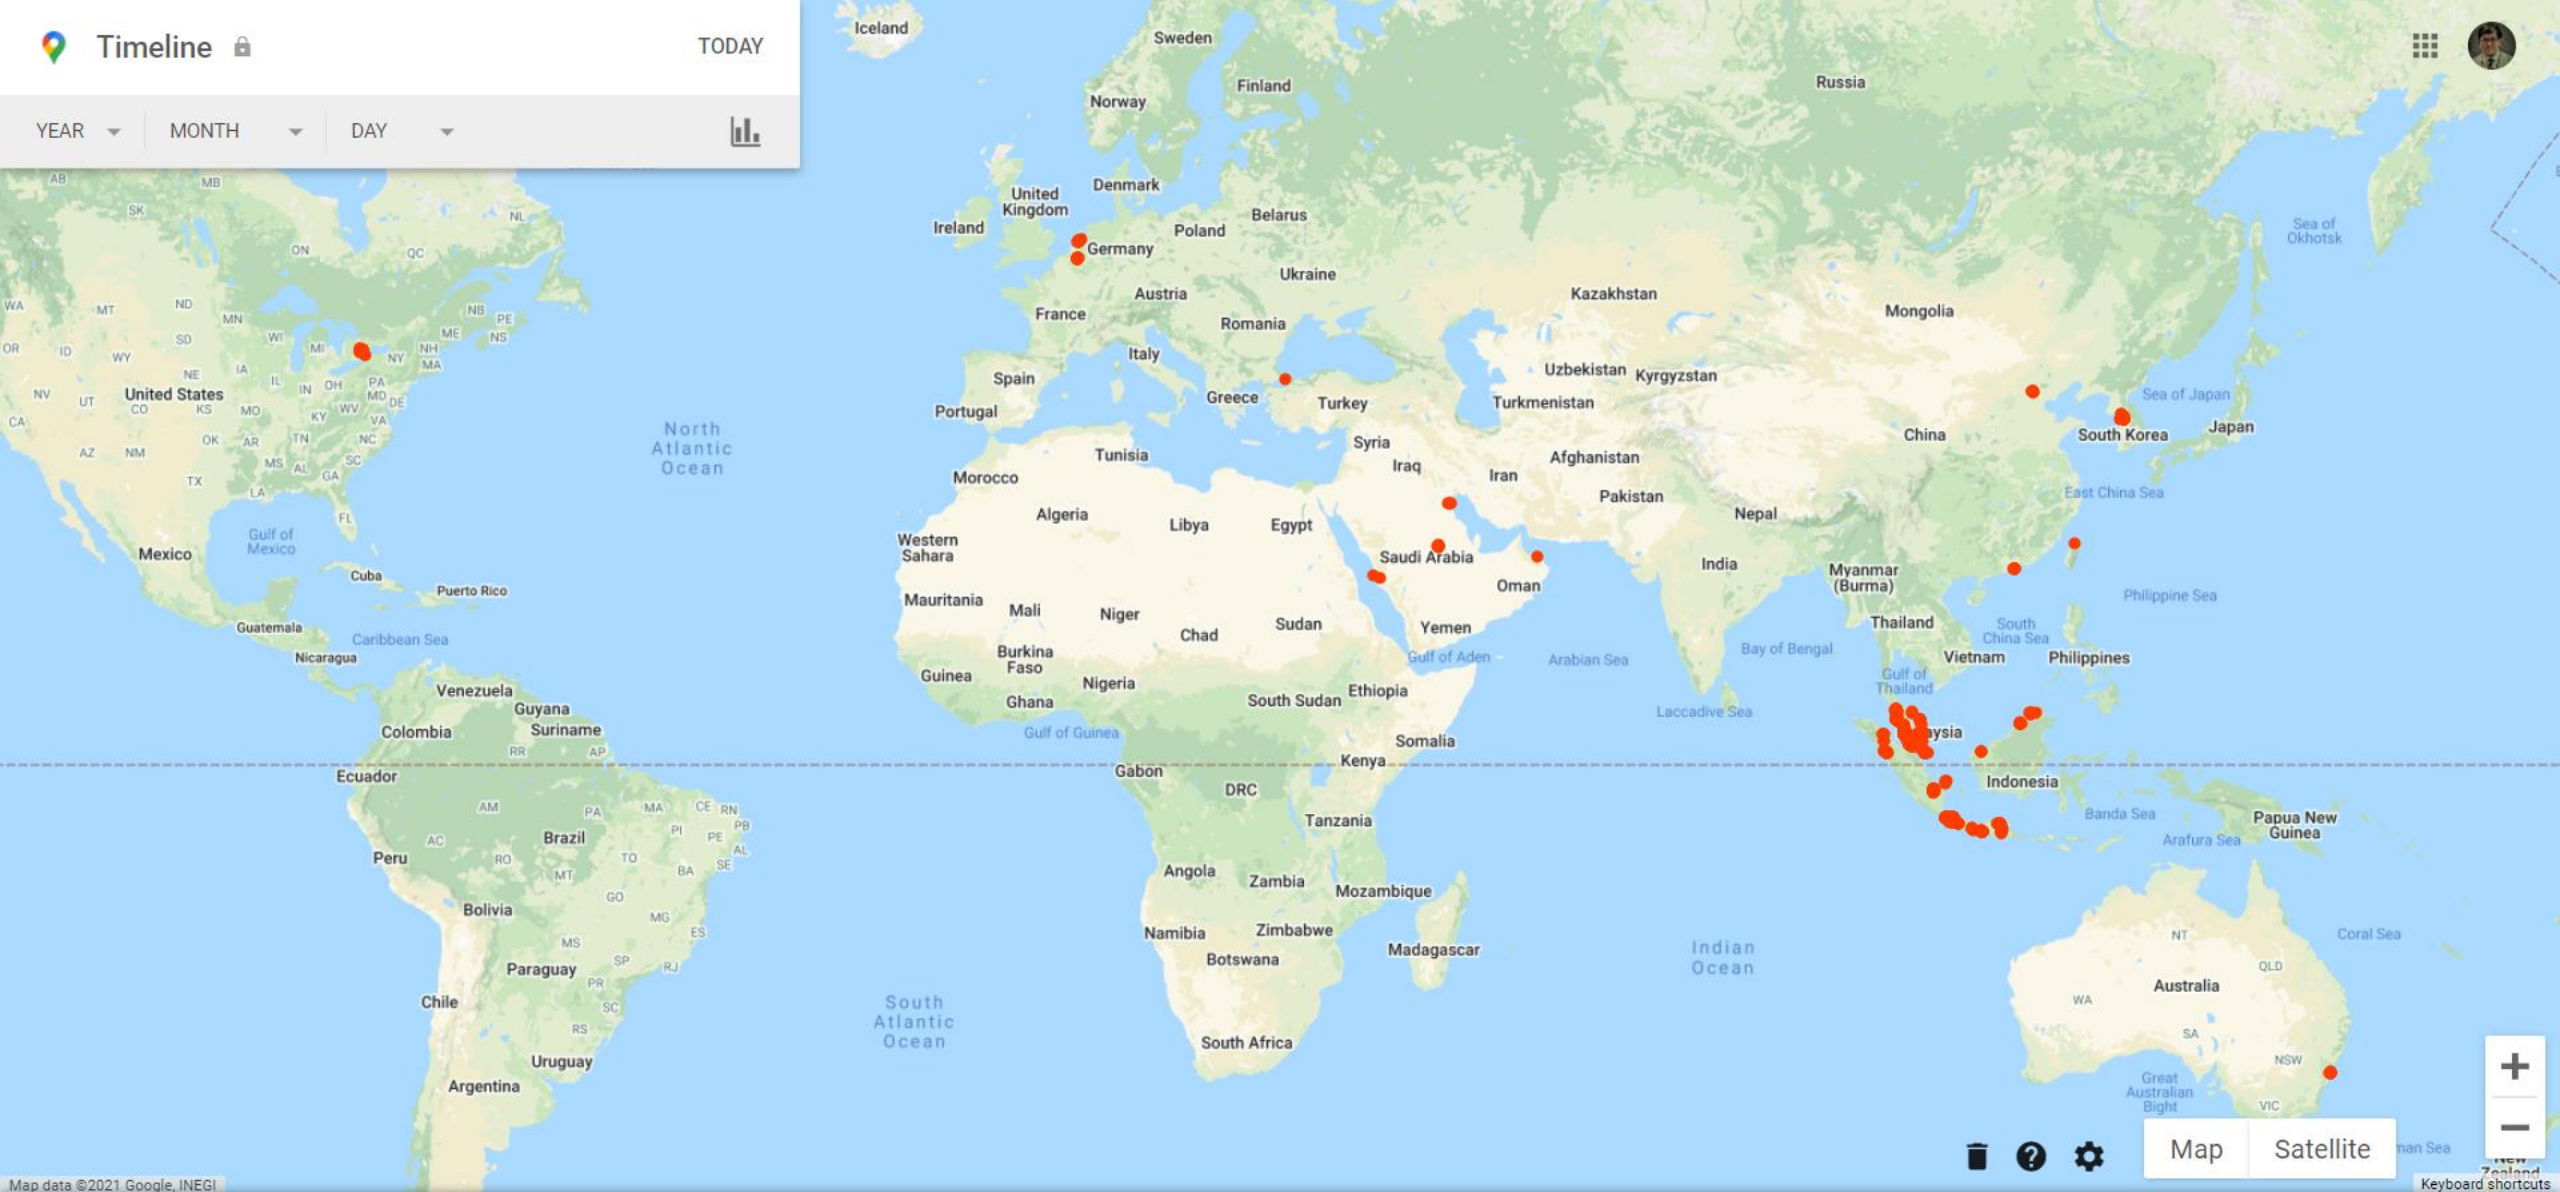

- Oh, yeah. Water has memory.

- And remembers everything.

- Hm.

DATAFICATION

What Google Knows

Google compiles enough data to build comprehensive portfolios of most users—who they are, where they go and what they do—and the information is all available at [google.com/dashboard](https://www.google.com/dashboard). Here are just a few things WSJ reporter Tom Gara found out about himself.

GOOGLE SEARCH 64,019

Google thinks Tom performs most of his searches around 8 a.m. ET, but this is probably skewed by years spent outside the U.S.

ANDROID DEVICES 3

Google knows all of Tom's synched Android phones, including the old Nexus S phone that he gave to his mom.

WALLET 3

Credit cards (two expired) saved in Google Wallet, plus two shipping addresses and 13 itemized purchases since June 2009.

DOCS 855

Documents Tom has created, plus the 115 he has opened that belong to other people.

EMAIL 134,966

All of Tom's emails since he first got a Gmail account in 2004. Google also stores his 6,147 chats.

CONTACTS 2,702

Google knows the people that Tom emails the most. At the top is a friend in Egypt.

YOUTUBE 9,220

Videos Tom has watched, listed in chronological order, including a series viewed in June about canoes.

GOOGLE PLAY 117

That's how many apps Tom has downloaded from Google's store.

PASSWORDS 35

Number of website passwords saved in Google's Chrome browser.

LOCATION Willunga, South Australia

Due to an unknown glitch, Google bases Tom's location from one of his old Android phones, which he gave to his mother in Australia.

What is Big Data?

“Big Data is an expression that typically refers not only to specific, large datasets, but also to data collections that consolidate many datasets from multiple sources, and even to the techniques used to manage and analyze the data”

M. R. Wigan and R. Clarke, IEEE Computer 46 (2013)

Big Data: The Islamic Worldview

(2:31) Then Allah taught Adam the names of all things and presented them to the angels and said: "If you are right (that the appointment of a vicegerent will cause mischief) then tell Me the names of these things.

وَعَلَّمَ آدَمَ الْأَسْمَاءَ كُلَّهَا ثُمَّ عَرَضَهُمْ عَلَى الْمَلَائِكَةِ
فَقَالَ أَنْبِئُونِي بِأَسْمَاءِ هَؤُلَاءِ إِنْ كُنْتُمْ صَادِقِينَ
AL-BAQARAH: 31

(39:9) ... Ask them: "Are those who know equal to those who do not know?" Only those endowed with understanding take heed.

قُلْ هَلْ يَسْتَوِي الَّذِينَ يَعْلَمُونَ وَالَّذِينَ لَا يَعْلَمُونَ إِنَّمَا
يَتَذَكَّرُ أُولُوا الْأَلْبَابِ
AZ-ZUMAR: 9

BIG DATA - *The Islamic Worldview*

Data as a Privilege

To be utilized in accordance with its beneficial functions, for the benefit of self and others.

Data as a Trust

Not to be abused, misused, overused and underused.

Data as a Test

To be accountable for in this world and hereinafter

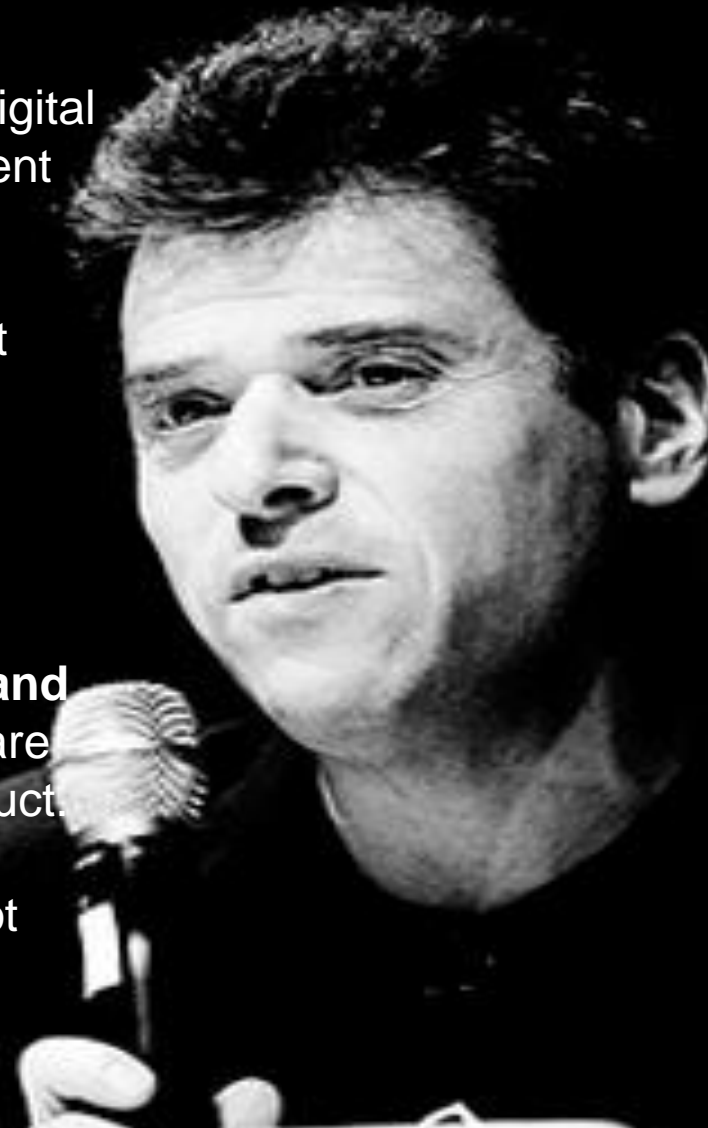

The more we use the contemporary digital network, the less economic value it is bringing to us!

Rather than generating more jobs, this digital disruption causes structural unemployment crisis.

Rather than creating more competition, it has created immensely powerful new monopolists like Google and Amazon.

Rather than creating transparency and openness, **the Internet is creating a panopticon of information-gathering and surveillance services** in which people are packaged as an all-too-transparent product.

Andrew Keen (2015): “The Internet is Not the Answer”

The Internet Is Not The Answer

'Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard.'
Po Bronson

Andrew Keen

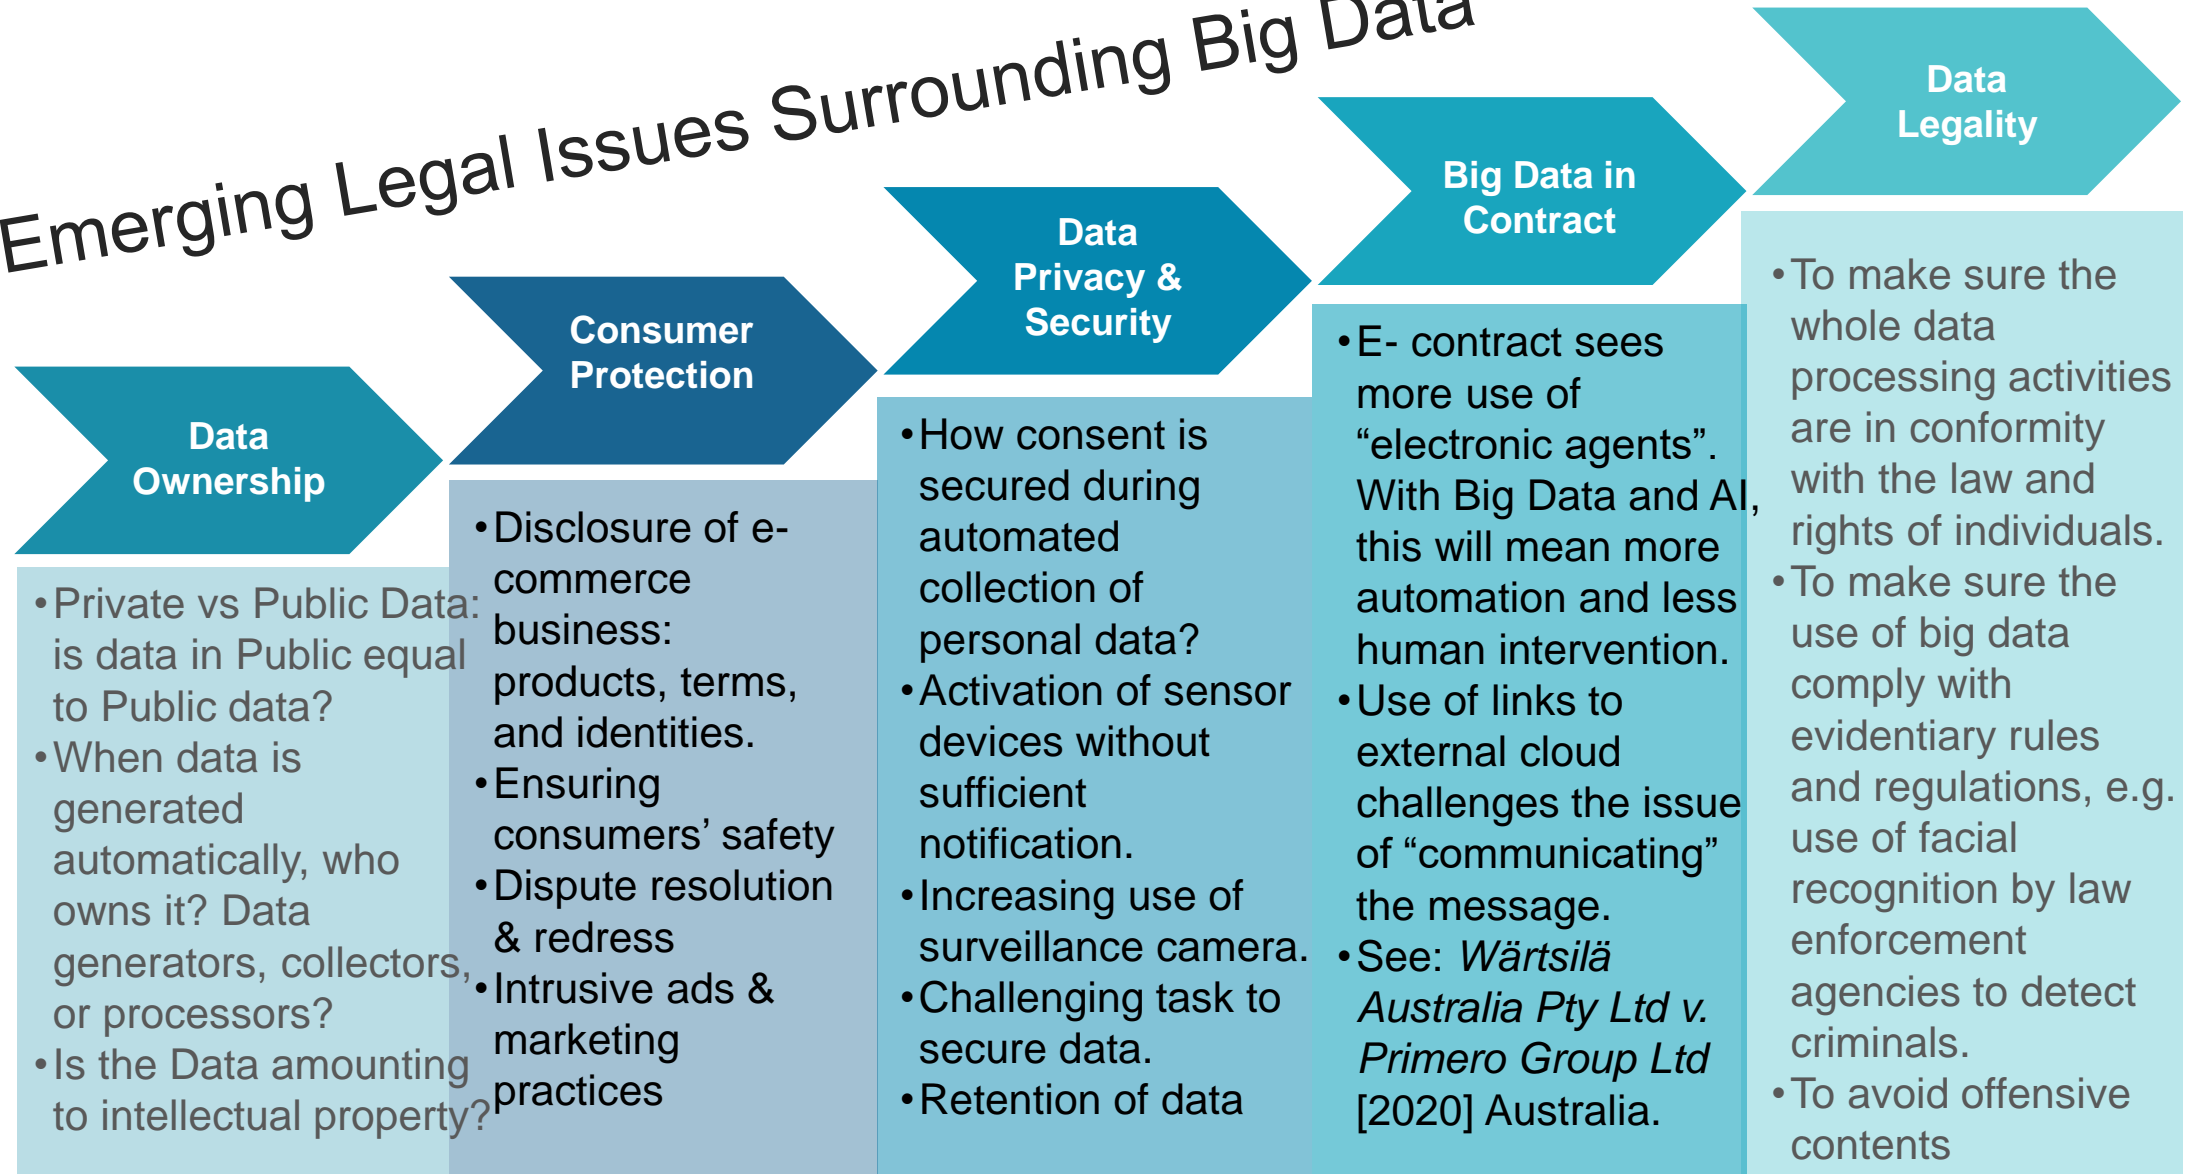

How we handle the emergence of an era of Big Data is critical...

With the increased automation of data collection and analysis – as well as **algorithms** that can extract and inform us of massive patterns in human behavior – it is necessary to ask which systems are driving these practices, and **which are regulating** them (“Six Provocations of Big Data,” Danah Boyd & Kate Crawford, 2011).

“SIX PROVOCATIONS OF BIG DATA”

1. Automating Research Changes the Definition of Knowledge.
2. Claims to Objectivity and Accuracy are Misleading
3. Bigger Data are Not Always Better Data
4. Not All Data Are Equivalent
5. Just Because it is Accessible Doesn't Make it Ethical
6. Limited Access to Big Data Creates New Digital Divides

Emerging Legal Issues Surrounding Big Data

Potentially deadly bomb ingredients are 'frequently bought together' on Amazon

Siobhan Kennedy
Washington Correspondent

A Channel 4 News investigation can reveal how Amazon's algorithm can guide users to the chemical combinations for producing explosives.

| | | 11. Privacy compliance |

EU PROPOSAL FOR A REGULATION OF ARTIFICIAL INTELLIGENCE (ARTIFICIAL INTELLIGENCE ACT) (21.4.2021)

Objectives:

- To ensure that AI systems placed on the Union market and used are **safe and respect existing law on fundamental rights** and Union values;
- To ensure **legal certainty** to facilitate investment and innovation in AI;
- To enhance **governance and effective enforcement** of existing law on fundamental rights and safety requirements applicable to AI systems;
- To facilitate the development of a single market for **lawful, safe and trustworthy AI applications** and prevent market fragmentation.

MODEL ARTIFICIAL INTELLIGENCE GOVERNANCE FRAMEWORK

PDPC SINGAPORE (21.01.2020)

Guiding Principles

Decisions made by AI should be
EXPLAINABLE, TRANSPARENT & FAIR

AI systems should be
HUMAN-CENTRIC

From Principles to Practice

Internal Governance Structures and Measures

- Clear roles and responsibilities in your organisation
- SOPs to monitor and manage risks
- Staff training

Determining the Level of Human Involvement in AI-augmented Decision-making

- Appropriate degree of human involvement
- Minimise the risk of harm to individuals

Operations Management

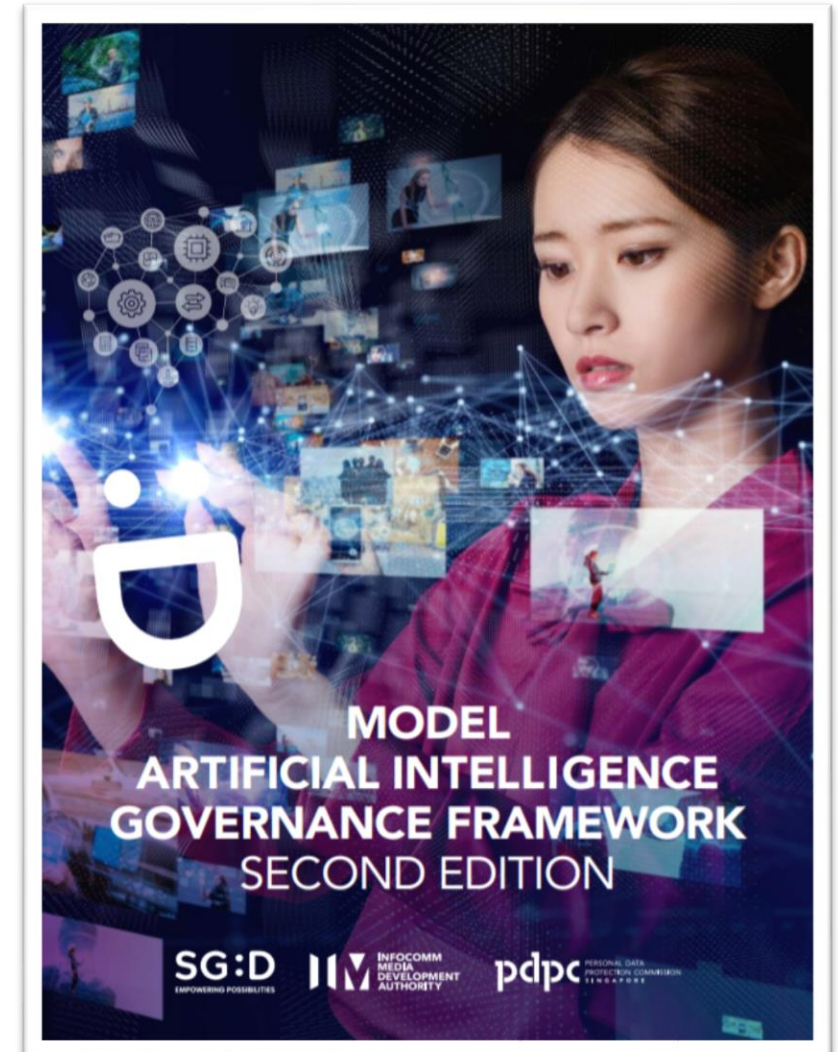

- Minimise bias in data and model
- Risk-based approach to measures such as explainability, robustness and regular tuning

Stakeholder Interaction and Communication

- Make AI policies known to users
- Allow users to provide feedback, if possible
- Make communications easy to understand

Source:

Takeaways

01

It is not that big size that matters, but the data analytic is

02

With more leverage to come, risks and challenges are unknown. But fundamental principles remain

03

Big data is led by innovation, law is the carrier, not barrier

04

Law and lawyers, traditionally, follow the innovation, but this time must follow fast

05

Privacy is the prominent area impacted by Big Data

REMEMBER, WITH BIG DATA

COMES BIG RESPONSIBILITY

BIG DATA

IS ABOUT
ACCOUNTABILITY

“

وَلَا تَقْفُ مَا لَيْسَ لَكَ بِهِ عِلْمٌ إِنَّ السَّمْعَ
وَالْبَصَرَ وَالْفُؤَادَ كُلُّ أُولَئِكَ كَانَ عَنْهُ
مَسْئُولًا

*Do not follow that of which you have
no knowledge. Surely the hearing, the
sight, the heart - each of these shall
be called to account
(Al-Isra', Chap. 17:36)*

”
