Key Points

- 01 Cyberspace: Reality Check
- 02 Understanding Cyber Security & Data Protection
- 03 A New Battlefield?
- 04 Lessons Learned

CYBERSPACE

REALITY CHECK

Society 5.0 >> Cyber Society

Society 5.0 >> Cyber Society

The Characteristics of Cyber Society:

- ✓ Diminishing border
- ✓ Time-zone doesn't matter, but timeline does
- ✓ The illusion of lawlessness
- ✓ Abundance of information – confusion between data and noise.
- ✓ Gadgets change, but data stays
- ✓ Rise of digital assets
- ✓ Digital natives take over
- ✓ Traditional authority being challenged

HUNTING SOCIETY

Stone, metal weapons
Pure natural sources

INDUSTRIAL SOCIETY

Electricity, steam locomotive
Printing machine

INFORMATION SOCIETY

Computer, satellite
internet

4.0

5.0

SUPERSMART SOCIETY

Big data, IOT, Artificial
Intelligence

The threats that global CEOs are most worried about...

CEOs rank cyber risks as the top threat to growth, with health risks close behind

Source: PwC 25th Annual Global CEO Survey

Why Cyber Risks?

Industry 4.0 – Where informatisation embraces datafication and transforms into automatisisation

Post-pandemic World – Efficiency, Work from Anywhere, Cloud as Service

Inter-dependence on public Information Infrastructure, e.g. telecom, data storage, health system, transport system, government

Increasing threat of attack to the digital assets (Cybercrimes, cyberterrorism, etc.)

Informatisation → Digitalisation → Datafication!

DATA

What Google Knows

Google compiles enough data to build comprehensive portfolios of most users—who they are, where they go and what they do—and the information is all available at [google.com/dashboard](https://www.google.com/dashboard). Here are just a few things WSJ reporter Tom Gara found out about himself.

GOOGLE SEARCH 64,019

Google thinks Tom performs most of his searches around 8 a.m. ET, but this is probably skewed by years spent outside the U.S.

ANDROID DEVICES 3

Google knows all of Tom's synched Android phones, including the old Nexus S phone that he gave to his mom.

WALLET 3

Credit cards (two expired) saved in Google Wallet, plus two shipping addresses and 13 itemized purchases since June 2009.

DOCS 855

Documents Tom has created, plus the 115 he has opened that belong to other people.

EMAIL 134,966

All of Tom's emails since he first got a Gmail account in 2004. Google also stores his 6,147 chats.

CONTACTS 2,702

Google knows the people that Tom emails the most. At the top is a friend in Egypt.

YOUTUBE 9,220

Videos Tom has watched, listed in chronological order, including a series viewed in June about canoes.

GOOGLE PLAY 117

That's how many apps Tom has downloaded from Google's store.

PASSWORDS 35

Number of website passwords saved in Google's Chrome browser.

LOCATION Willunga, South Australia

Due to an unknown glitch, Google bases Tom's location from one of his old Android phones, which he gave to his mother in Australia.

Social media posts,

Prominent Threats and Risks of Cyber Security

Personal data exploitation through **illicit collections** via online services (eg P2P lending), Apps, etc;

Scam via fake accounts begging for donation, fake charity drives, fake emergencies etc.

Misinformation: citizen journalism with unaccountable stories – a test-bed for phishing attacks.

Unsecured online platforms prone to personal data breaches (online shopping, online meeting, social media, etc).

The rise of public **surveillance** and Private data collection?

Post-Pandemic Cyber Vulnerabilities

INFORMATION

People tend to **rush collecting** information about the Pandemic, click on links and web pages, spreading the information with **poor exercise of fact-checking**

TECHNICAL

People work on **official documents** using home-based computers, with **inadequate security protection** and support as they have in office.

FINANCIAL

Reduced mobility, **losing jobs**, scarcity of earning opportunities, etc. creates financially challenged society, who would **turn into shortcuts (crimes, etc)**.

TRUST

Wide and fast **adoption of mobile Apps** for social networking, e-shopping, e-meeting, e-learning and cloud services, but with poor **security and privacy measures** or policies

Post-Pandemic Cyber Vulnerabilities

PANDEMIC COVID-19

Beware of cyberattacks!

Total number of incidents

- > Cybersecurity cases increased by 82.5% during the MCO 2020 (March 18 to April 7) compared to the same period in 2019.

Tips to stay safe online

Working from home

- > Update all systems including Virtual Private Networks (VPN) and devices with the latest security patches
- > Alert employees about phishing attempts.
- > Avoid logging in to your work environment using public Internet Wi-Fi. Connect through your home or mobile network data.
- > Enable Multi Factor Authentication

Covid-19 scams

- > Always verify information from emails, text messages and social media posts about Covid-19.
- > Do not share personal or financial information in emails
- > Do not click on suspicious links provided to you on Covid-19, verify with the sender or agencies that can help.
- > Use legitimate, government websites for up-to-date, fact-based information

Video teleconferencing apps

- > Use the latest version of apps and security software
- > Only download software from its official website or app store.
- > Never share confidential information during a meeting
- > Enable non-recordable videos and audio, and limit file sharing.
 - > If something is suspicious, log out.
 - > If you lose your computer or mobile phone, log out from all clients immediately and change your login password.
 - > Do not share or publish the confer
 - > Log out from the app after a meeting.

Exploitation of Cyber Information Infrastructure (CIIP)

Post-Pandemic Cyber Vulnerabilities

Terrorists and cybercriminals are always interested to exploit cyberspace vulnerabilities. The activity of cyber terrorism does not relax during Covid-19. Several cyber attacks do target a critical information infrastructure (CII), a traditional target for cyber terrorism.

Cybersecurity A New Battlefield?

Russia-linked cyberattacks on Ukraine: A timeline

Cyber incidents are playing a central role in the Russia-Ukraine conflict. Here's how events are unfolding along with unanswered questions.

Fintech-related Data Breach

LINDUNGI DATA PRIBADI NASABAH PINJAMAN ONLINE

Catatan LBH Jakarta:

- 1.330 laporan korban pinjaman online (pinjol) dari 25 provinsi
- 89 fintech melanggar hukum dengan menyebar data pribadi nasabah
- 25 fintech yang melakukan penyebaran data pribadi terdaftar di OJK
- Akibat persebaran data, korban menerima ancaman, fitnah, hingga pelecehan seksual

3.193 PINJAMAN ONLINE ILEGAL DIBLOKIR

Satgas Waspada Investasi (SWI)
Otoritas Jasa Keuangan (OJK)
memblokir 3.193 pinjaman online
atau pinjol ilegal

Masyarakat terjebak pinjol ilegal
karena rata-rata tidak meminta
persyaratan yang ketat untuk
menggaet nasabah

Pinjol tersebut
memanfaatkan data
pribadi nasabah untuk
keperluan penagihan
dengan mengintimidasi

Pemberi pinjaman
sewaktu-waktu akan
menggunakan data pribadi
nasabah untuk meneror
yang tidak segera
melunasi pinjaman

Bunga bisa
sampai:

**2-4%
PER
HARI**

Kita sudah
memblokir
3.193 pinjol ilegal.
Jumlah ini sangat
besar"

Tongam L Tobing
Ketua Satgas Waspada Investasi OJK

CYBERSECURITY

ARE WE (LEGALLY) READY?

A New Battlefield for the Indonesian Authority

Pasal 40 UU No. 11/2008 Ttg ITE

Pemerintah memfasilitasi pemanfaatan Teknologi Informasi dan Transaksi Elektronik sesuai dengan ketentuan peraturan perundang-undangan.

Pemerintah melindungi kepentingan umum dari segala jenis gangguan sebagai akibat penyalahgunaan Informasi Elektronik dan Transaksi Elektronik yang mengganggu ketertiban umum, sesuai dengan ketentuan peraturan perundang-undangan.

Pemerintah wajib melakukan pencegahan penyebaran dan penggunaan Informasi Elektronik dan/ atau Dokumen Elektronik yang memiliki muatan yang dilarang sesuai dengan ketentuan peraturan perundang-undangan.

Dalam melakukan pencegahan sebagaimana dimaksud pada ayat (2a), Pemerintah berwenang melakukan pemutusan akses dan/atau memerintahkan kepada Penyelenggara Sistem Elektronik untuk melakukan pemutusan akses terhadap Informasi Elektronik dan/ atau Dokumen Elektronik yang memiliki muatan yang melanggar hukum.

Pemerintah menetapkan instansi atau institusi yang memiliki . data elektronik strategis yang wajib dilindungi.

Are We (Legally) Ready?

Meanwhile in Malaysia....

A New Push for Indonesian Government

G-20 Summit 2019: Osaka Track on Data Free Flow with Trust (DFFT)

G-20 Summit 2022

“Ini adalah sebuah kepercayaan dan kehormatan bagi Indonesia menerima **Presidensi G20**.”

“Dan dalam Presidensi G20 Indonesia akan fokus untuk mengerjakan tiga hal: Pertama, penanganan kesehatan yang inklusif. Kedua, **transformasi berbasis digital**. Ketiga, transisi menuju energi berkelanjutan.”

G-20 Summit 2022: What will the Host say about Data Protection?

The Future for Our Cyber Security and Data Protection

- ❖ Internationally accepted benchmark?
- ❖ 3C: Clarity, Comprehensive, Concerted Law?
- ❖ Regulate = Balance between carrot & stick?
- ❖ Effective Mechanism of Enforcement?

Past

Present

Future

- ✓ Digital Sovereignty
- ✓ Transparency (Good Governance)
- ✓ Sustainable Business
- ✓ Sustainable Innovation

LESSON LEARNED

KEY TAKEAWAYS

RESETTING CYBER SECURITY CULTURE

Cyber security is a process, not a product. It is a journey not a destination

CYBER SOCIETY: INTERDEPENDENCE

With the interdependence of information infrastructure, collective efforts to secure our cyberspace is necessary

Lesson Learned

sonnyzulhuda.com

NEW OFFENCES, NEW LAWS

Restrictions are introduced to reshape the new expected behaviour on data

CYBER SOCIETY NEEDS CYBER LEADERSHIP

No order without law, no law without enforcement, no enforcement without leadership

THANK YOU
